Biach's Electric Stud
Drive Tool

BIACH PREPARES FOR ITS 12TH ANNUAL OWNERS GROUP WORKSHOP

Our workshop is scheduled for June 3rd – June 5th. If you are interested in attending and did not receive a reservation request please contact Barbara Penn at bpenn@biach.com. Reservations must be received by May 15th. We cannot guarantee an opening after that date.

NUCLEAR INDUSTRY NEWS

New Orders for Biach's Stud Elongation Measurement System (SEMS):

The Fermi plant and ANO Plants recently placed their orders. Diablo Canyon ordered two last December, Monticello ordered the SEMS HC version and Southern Company's Vogtle and Hatch plants each received their SEMS III units in December.

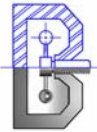

New QD-H Conversion:

Dominion Energy placed an order for the 2nd phase – QD-H pull Systems – to upgrade the thread on style tensioners shared at Surry and No. Anna. Previously, Biach had supplied new housings designed to accept the QD-H style pull system. They now become the 19th QD-H tensioner site and the 32nd overall site to use a Biach QD or QD-H style stud engagement design. Ordering elements in phases helped the sites secure budgetary funding.

The Wolf Creek Plant placed its order for a new EPN Pumping System to replace its very old design.

Progress Energy took delivery of 2 Biach Electric Stud Drive Tools in December for their Crystal River Plant.

Stud Tensioner Test Block Assemblies were provided to the ***River Bend and Ft. Calhoun*** sites.

OTHER INDUSTRY NEWS:

Bucyrus Erie placed another order for Biach's CC250 Bolt Tensioner and Pumping system.

Sealed Air (China) ordered two Biach CC175 Bolt Tensioners powered by our Model 4000 pumping unit.

Biach's CC Style Bolt Tensioners

Bechtel Plant Machinery sent 7 bolt tensioners in for refurbishment after years of service.

The Drummond Company ordered Biach's CC275 and CC350 Bolt Tensioners with adapters for multiple bolt sizes.

Foster Wheeler ordered another tensioner for its coal pulverizers.
